**Comments:** I am writing to express my concerns for the upcoming mineral sands mine in Glenaladale. I have resided in East Gippsland my whole life and take pride in its natural beauty and the wonderful health aspects living in the county brings. I have huge concerns over the environmental effects statement and the damage it is certain to do to our community. I believe it is going to have devastating effects on not only the nearby farmers but the wider community. Health issues, environmental problems, wildlife habitat destruction and a huge mental health concern for all farmers directly impacted by the careless project. Please re consider and DON'T approve this project. It is going to negatively affect our area more than any positivity the financial aspects could ever bring. Something's should be more important than money..
