Comments: To whom it may concern, I am writing to express my objection to the proposed fingerboards mine. Kalbar's geochemistry report lists a number of radioactive and cancer-causing substances that will be present in the dust generated. Dust can travel far so this potentially could effect the entire district. The mine is too close to where many families live, farm, work and go to school, it is a highly inappropriate area. We can not risk negatively impacting our agricultural industry via land or water contamination. The \$155M/year Mitchell River Valley vegetable industry that employs up to 2,000 people is as close as 500m downwind from the mine. There are numerous environmental risks with such a mine, it simply isn't worth it.
Regards, (Name provided separately)
