Comments: Every year we travel to East Gippsland to enjoy the beautiful scenery, camp and swim in the Mitchell River, if anything was to risk the beautiful river it would be devastating for me and my family. We have good friends who farm the land and grow grapes for their winery in the area and they are concerned that a mine could risk the quality of the water that is essential to their farming. The last thing the area needs is a mine, the last thing our planet needs is another mine, please stop this!
