Comments: I live on [REDACTED], an amazing and beautiful place to live so close to Bairnsdale on the Mitchell River. We have worked our whole lives towards buying this house. This lifestyle. We paddle board, we kayak, we fish, we swim, we view birdlife and are blessed to see dophins playing in our waterways. Truely a playground for all. I am extremely concerned about the health of our river. I am equally and genuinely interested to know my rights. Our title on Robb Street, together with every ither resident on the river frontage of Robb Street, are one of the very few landholders in Australia who own into the river. Each and everyone of us own lour portion of the Mitchell River yet we have had no formal notification/request/correspondence from this mining company or associated party regarding the potential effect their business will have on a part of thenwater system we own. I feel this is a massive oversight and should the partial water system, we officially own, be effected in any way by this company, they will be liable to rectify and reverse any effects. I would like to be contacted in this regard as to date, the effect of property we own has not been taken into consideration at all in this project.
