Attachment 1:

Attachment 2:

Attachment 3:

Comments: I appose the granting of approval for the Kalbar Mineral Sands Mine at Fingerboards, Glenaladale for the following reasons. 1. The prevailing winds will blow toxic dust over the food producing Mitchell River Flats. 2. The amount of ground and River water required is in conflict with current water requirements in the area, e.g. Town water supplies, Agricultural water supplies, Environmental flows into the Gippsland Lakes. 3. There is no plan to rehabilitate the material removed from the site, there will be a large hole left in the landscape. 4. The heritage of the Finger Boards area as a cattle sale location for high country graziers will be lost. 5. The devaluation of surrounding properties in the future. I want my submission to be recorded as against the approval of the mine.
