Comments: I have spent much of my youth and adult life holidaying and living on the edge of the Mitchel River in Wuk Wuk. This area is within the documented exploration zone of the Kalbar mine. This area is a precious natural wonderland full of unique and delicate flora and fauna that will be in direct threat by the proposed Mine. The area also contains well documented sites of Aboriginal Significance that need to remain untouched and sacred to the original custodians of the land. The proposed exploration zone will directly impact the 155 million dollar commercial vegetable industry of the Mitchel river valley. If this industry is impacted it will directly impact all of the community financially and mentally with the consequences reaching far and wide around the country. I OPPOSE THE MINE. It has too many negative environmental and economical impacts on our already stretched land and community. Please consider our native owners and future generations. Thank you.
