**Comments:** I am a born and raised in East Gippslander and over the years have grown so very fond of this area and its surrounds. East Gippsland is the home to some of the most breathtaking water ways and lake systems and also the "food bowl" for this state. Allowing the kalbar mineral sands mine to go ahead will not only impact the local eco systems, farm lands and a lot of the states vegetable supplies, it will destroy this place I cal home. It will pollute the district, it will impact locals health and destroy families and their history. This mine is not for the East Gippslanders. We don't want it here. We have fought against this for years and will continue to fight. Allowing this to go ahead would be an absolute disgrace.
