Fingerboards Mineral Sands Project Inquiry and Advisory
Committee - EES

220

Request to be heard?: No - but please email me a copy of the
Timetable and any Directions

Full Name: Belinda Anouska Blundell

Organisation:

Affected property:

Attachment 1:

Attachment 2:

Attachment 3:

Comments: I object to the mine and feel like I need to express my concerns as follows:- - the negative impact of taking the huge amounts of water out of the Mitchell River; - the potential waste product issues; - the impact of dust on our local waterways and environment; - the likely devastating impact on the local farming communities; - how the production of food will be forever negatively effected; - the impact on the local indigenous sites, particularly those that may not be officially recorded; - the legacy of destruction the mine will cause on future generations; Surely with all the science known currently around the devastating impact of mines such as this proposed one, it cannot proceed. The benefits in no way stack up against the huge negatives. On behalf of myself and my three young children who live in this beautiful area, please do not add any further environmental destruction, stop this mine from going ahead.
