Comments: Hello Thank you for giving us the chance to oppose this project. We in East Gippsland do NOT want this mining proposal to go ahead. We have been through enough, we need to recover after the fires, to look after our environment and to encourage recovery in a sustainable and environmentally friendly way. There are many jobs that we can create that are environmentally friendly, we do not need this. The river should be left how it is, not used for this dangerous project. We do not want a polluting tailings dam threatening our underground water supply either. There are many crops in the area of the proposed mine that provide sensitive green foods like lettuces for Melbourne supermarkets, let's keep them clean, this proposal in plain stupid in such an area. We are trying to attract tourism back to this area, a mine is the last thing that we need. I pray that your considerations hear the will of the people and stop this project in it's tracks. With kind regards Julia Delaney Secretary W Tree Progress Association
