Attachment 3:

Comments: I object to the establishment of the Fingerboard mineral sand mine. The risk to our health from dust on the Lindenow vegetable farms and water going into our precious Gippsland lakes is too great. Roads in the area are not suited to the trucks that will carry the sands and the increased traffic volume. Water from our aquifers and Mitchell River is needed here particularly in the time of climate change and drought. Please don't let this go ahead.
