Attachment 3:

Comments: I am writing this on behalf of two friends that live in the Gippsland area who are first generation farmers. This mine is only going to serve as another example of the government favouring big corporations over the individuals who live in the area and who contribute day by day to the community unlike whoever owns this mine that's about to be built. Please consider smaller more ethical projects to bring in profit to the community, its not about quantity it's about quality.
