**Comments:** I do not live on Victoria, but I spent years working farms in this region and the impact this mine will have on the well-being of the community that currently exists and the impact on its future. The environmental impacts on this region caused by this mine are irreversible. The delicate balance this ecosystem relies on; to sustain its biodiversity and to sustain the health of its inhabitants can not be understated. Continuing with this mine is shortsighted and arrogant, to believe that this is a beneficial move for the future of humanity in the face of climate extremes and collapsing ecosystems caused by capitalism is mindless and violent. I wholeheartedly disagree with this mine. I wholeheartedly disagree with pumping millions of litres of water in an attempt to combat a mines affects. I wholeheartedly support this community and it's farmers and it's wildlife and biodiversity.
