**Comments:** I grew up in Lakes Entrance, many of my family live there and I visit regularly with my growing family. The water, the environment, the open paddocks, rivers, ocean and forests are what make it special. It is what keeps the area alive with visitors. I have watched the area grow and change for 34 years. The promise of bringing jobs to the area is not worth devastating the environment over - potentially risking existing jobs and an entire tourism industry in the process. I strongly oppose the mineral sands project. Our environment is much more valuable than money.
