Attachment 3:

Comments: I strongly oppose the development of this mine for many reasons. 1) The devastating impact on the farming families who will lose their land. 2). The lose of prime agricultural land forever. 3). The many potential negative enviromental impacts to the greater area including the Gippsland Lakes. 4). The manner in which a big Company has tried to smooth talk their way through widespread community resistance from the time this Project was first mentioned to the Public. 5). The dodgy manner by which the East Gippsland Shire overturned their decision not to back the mine.
