**Comments:** It is with great concern that I write to ask that you oppose the proposed open cut mine at Glenaladale. It must not go ahead. The proposed location is unacceptable on many fronts. Our region is a food bowl, supplying fresh produce to Australia and beyond. It must not be contaminated. The water required is not acceptable. Our famers are often farming under water restrictions. We have been in drought for 3 years. The Mitchell river feeds into the Gippsland Lakes an awesome natural resource that must not be contaminated. Our community must not be subject to the Health risks this mine would bring. Please make a stand and stop this proposal.  
Kind Regards Susan Wharfe
