Timetable and any Directions

**Full Name:** Emily Healey

**Organisation:**

**Affected property:**

**Attachment 1:**

**Attachment 2:**

**Attachment 3:**

**Comments:** This is a short sighted proposal. Why risk sustainable, prime farming land, for a 20 year project? Why risk the fresh water that an entire region needs, for a 20 year project. The selfishness and wastefulness of these big corporations is abhorrent. I would like my children and possible grandchildren to have a healthy earth to live on. We need to be re-wilding the earth. Not ripping it apart and tearing it down for a bit of powder in the ground. How ridiculous. Mining is not sustainable. All it does is fill the overflowing pockets of rich people, with more money. No one, but Kalbar and their shareholders, will benefit from this mine. This will not create jobs for local people. All employees will be from other areas, who already work and are qualified in the mining industry. Don't pretend this will be a good thing for East Gippsland. This will be the beginning of the end for us. And the end will come very quickly.
