Comments: After the bush fires, covid 19, another mine destroying numerous aboriginal cultural sites. I just don't understand why east Gippsland can't be just left alone. Places like bairnsdale struggle to create tourism and the effects of putting a water guzzling, toxic mine right next to it is just unthinkable. Surely the government has some sort of empathy when it comes to struggling regional communities. Surely they aren't a bunch of hollow suits, hungry for money. This will destroy the communities around east Gippsland
