**Comments:** I have lived on the Gippsland Lakes for 11 years now, raising my two children here because of the beautiful environment and the community. I have seen this mine proposal divide our community. Our home, our backyard is more important than a MSM mine that has the potential to have detrimental effects on the environment but also on our community. To risk damage to the Mitchell river, the Lakes, the farms, our water, the physical and mental health of the people living nearby is just not worth it. The people who profit don't care about our quality of life and the environment. East Gippsland residents will be the ones left with the damage in the future. Not just environmentally but also within the community.
