Fingerboards Mineral Sands Project Inquiry and Advisory
Committee - EES

617

Request to be heard?: No

Full Name: Hannah Gravenall

Organisation:

Affected property:

Attachment 1:

Attachment 2:

Attachment 3:

Comments: Kalbar needs over 3 billion litres of water annually for processing and dust suppression for 15 years. This shows how much water is needed to control the dust which will potentially pose major human and animal health risks.
