---

**Subject:** Stop Kalbar

Dear Mr Wynne

I have been an active registered nurse in East Gippsland(E.G.) for 35 years  
My late super fit 65 year old husband Alan (passed away in March from cancer) engineered some of  
the brilliant developments in EG over the past 35 years

I am writing to say **please STOP KALBAR** from mining in our pristine Lindenow Valley. This is a  
beautiful food bowl for many Australians and is under threat of contamination by this **94% foreign  
owned sand mine**

In the Environmental impact statement it reports there are  
**highly toxic carcinogenic heavy metals in the dust** that will blow over our local residents, farms and  
vegetables and into our waterways

Loosing my husband to cancer moves me to ask you please do not put anyone else at risk of cancer in EG

The **3 billion litres of water annually** it will remove from our aquafer will also be detrimental to our planet

Thank you

Kindest regards

Anne Cross
