Comments: I am against the Kalbar mines mineral project! It is outrageous and will devastate my hometown, all the surrounding areas and most of all our water and food supply! Our rivers will run polluted and filthy, contaminating not only live stock, agricultural farms, crops but the very earth itself! The air will be riddled with cancer causing and radioactive toxins endangering not only our youth but ourselves and our seniors heavily! This is terrifying! To even comprehend that this thing, monster of a plan, will be only 20km away from my bloody house! From the schools, The town itself and even worse only 350 metres from the god damn heritage listed MITCHELL RIVER!!! Which if polluted will effect everything... How can you kalbar operations not sympathise with our town and the surrounding, that this will tarnish our already drought/ fire devastated home. This project is the nail in the coffin that'll destroy east gippsland once and for all
