**Comments:** Enough Victoria! This project will see the removal of over 700 large mature trees. Flora and fauna species are threatened. How many more headlines will we see like the ones this year already: "Mining firm sorry for destroying Aboriginal caves" or "Djab Wurrung tree: Anger over sacred Aboriginal tree bulldozed for highway". It's horrific for Australia's First Nations people as these lands are irreplaceable. Our land's history and heritage is for all Australians!
