**Comments:** I have been a volunteer working with teenagers for 40 years. We take these young people on overnight hiking and canoeing adventures on and around the majestic Mitchell River. To destroy the River, the culturally significant area of the Mitchell River National Park and Providence Ponds, to impact on the farmlands, the unique and world listed Silt Jetties and the beautiful Gippsland Lakes is madness. The Lakes are home to the Burrunan Dolphin, found only here and Port Phillip bay. Nowhere else in the world! The very future of this fragile ecosystem will not survive the environmental vandalism proposed by Kalbar. The future is not yours to own. I strongly object. Sincerely, Michelle Crozier
