**Comments:** To the enquiring and advisory committee, I have been a visitor to East Gippsland for several years now and I am against the introduction of the Kalbar mine. My partner and her family have lived there for their whole lives and their appreciation for their community and the environment that they live in is palpable. The Kalbar mine will threaten the livelihoods of many in East Gippsland, impacting the environment and the culture and I am entirely opposed to the development of the Kalbar mine.
