Fingerboards Mineral Sands Project.

Dear Inquiry & Advisory Committee members,
We strongly object to the proposed mineral Sands project

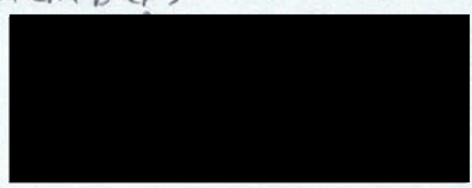

we operate a beef farming enterprise and recently have leased part of our property to a existing vegetable grower on the outskirts of the Lindenow township.

Our community has been through Drought, Bushfires, covid and now Kalbar. There is a saying - horses for courses and the proposed site is obviously not the right area as the potential consequences are so damaging in relation to the health of the community, the disastrous effects on the renowned Lindenow horticultural industry and other agricultural businesses not to mention the significant environmental effects. There are submissions that have been sent to this inquiry that supports this.

We appeal that you reject this proposed mine as the damaging effects it will create would significantly outweigh any benefits.

Yours sincerely,

Very concerned community & agricultural members.

John Maglione.
