Dear Inquiry and Advisory Committee Members

I am opposed to the mineral sands mine at Glenaladale.

I'm concerned for many reasons. The mine will be too close to many houses, the vegetable fields in the Lindenow Valley, the Mitchell River plus the impact of the noise from all the trucks and the mine itself.

I am also very concerned about the dust. I would like the panel members to make sure that the content of the dust is fully disclosed because I am worried about what might be in the dust and the impact it might have on the health of people.

I think the environmental risks are too great. Based on the failures that I have heard about in other places with mining operations I am worried that similar problems might occur here.

Yours sincerely

Ruth Wiltshire
