I would like to express my concern over the lack of consideration given to the community health in the local areas potentially affected by the proposed Kalbar Operations in Glenaladale area. I am also shocked and disappointed that a project of this size could be ushered through during a time where the community is restricted by law from expressing itself in full capacity. I sincerely hope that you are as concerned about this as I am as a local resident, I am not an expert but it is very clear to me that we have reason to be concerned and the company has had a lot of trouble making the documents look acceptable in theory, I can only hope they are also acceptable in practice. we have seen to many examples over the years of profits before people, please don't let Chinese profits be a higher priority than the local community here.

I would appreciate also if you could steer me to the documentation that outlines the benefits to the local community and to our state when all the minerals are being overseas only to be made in to useful tools and sent straight back as you know, I am very tired of seeing this pattern over and over I am willing to pay for a quality Australian product but they are very hard to find.

Regards
David James
Bairnsdale Resident
