Attachment 3:

Comments: I refer to the advertised Kalbar Mineral Sands Project and advise that I object to the project on the following grounds (1) It cannot be guaranteed in the future that the proposed mine will not have an adverse affect on the important market gardens in the Glenaladale / Lindenow areas (2) The perceived economic benefit from the proposed project will not equate to the losses possible from the project (3) That it cannot be guaranteed that the project will not have an adverse impact on the water quality in the Mitchell River and its catchment in the long term. (4) That the proposed transportation of the material may cause danger to lives through increased traffic congestion. I consider that if approval for this project is given that it will be to the detriment of this area and its renown as being a valued and important food bowl for our state and that the risk is to great as the eventual company may not mine and manage it in the manner proposed.
