**Attachment 3:**

**Comments:** My name is David Nightingale and I am a long time visitor to east Gippsland, running volunteer camps for children in this area. To even consider allowing this coal mine to go ahead in such a pristine environment is criminal. The destruction of habitat and it's effects on the wildlife and the environment would be abhorrently repugnant. Coal is an unviable commodity for the area. A huge loss with no long term gain as we move to cleaner forms of energy. Please reconsider this venture for the protection of the environment, wild life and future generations.
