**Comments:** I'm so disappointed with Kalbar and East Gippsland Shire for saying this can go ahead and putting us in danger. I lived in Hillside with mum and dad when I was little, now I'm living in Bairnsdale now. All our water comes from the Mitchell River and so do our vegetables. Potential impacts no water, dust, noise, wont be able to have clothes on the line because of the toxic dust During the 2019 drought, vegetable growers had to plough in crops as there was not enough water If Kalbar take water for the mine, this will again impact the vegetable growers. I'm an also concerned that the cultural heritage sites will be impacted, I wouldn't want my grave to be dug up in the name of progress and neither should Aboriginal land. As an [REDACTED] the dust will severely affect my health
