**Comments:** I cannot sit idly by and watch as greedy fingers plunge into one of the most fertile food bowls in Victoria, possibly Australia. I grew up in Gippsland, and having just had my heart broken by the bushfires just gone, now this is planned to occur just as the embers are still fading? We need to move on from fossil fuels. We cannot keep going this way. We need to protect our land, especially now. I will not now, not ever support this mine.
