Comments: See attached submission

Dear Inquiry and Advisory Committee Members,

My concern is, I have not heard anyone for or against the mine say anything about wind direction.

90% of the time, the wind blows from the West, South West, South and North West through the Fingerboard area and all areas East downstream on the Mitchell River and Gippsland Lakes, including Bruthen area.

Is there an independent source that could verify this. A few flags or wind socks would verify the direction the wind blows from.
